Summary

Full Stack Developer skilled in building scalable backend systems, real-time applications, and cloud-native deployments using **Node.js, Phoenix, Supabase, React.js, Redis, and AWS**. Experienced in designing production-grade APIs, CI/CD pipelines, caching strategies, and performance optimization, improving system response times by up to **40%**.

Experience

Go Laddu

Backend Software Engineer Intern

Sep 2025 – Apr 2026

Bangalore, Hybrid

- Built scalable REST APIs and real-time backend services using **Elixir/Phoenix**, improving user engagement by **15%**.
- Deployed and scaled backend services on Linux servers using **Hetzner Cloud**, load balancing, and production-grade infrastructure.
- Designed and implemented **CI/CD pipelines** with GitHub Actions for automated builds, testing, deployments, and database migrations.
- Integrated **Redis caching**, reducing database load and improving response time by **40%**.

Sankhyana Consultancy Services Pvt. Ltd.

Software Engineer Intern

Mar 2025 – May 2025

Bangalore

- Developed responsive frontend components using **React.js** and **Tailwind CSS**, improving UI responsiveness by **40%**.
- Built and optimized scalable **Node.js REST APIs**, reducing API latency by **150 ms** and improving overall performance by **30%**.

Projects

Learning Management System | [GitHub](#) | [Live Demo](#) | *MongoDB, Express.js, React.js, Node.js, Redis, Stripe, AWS*

- Built a full-stack LMS with secure authentication, **RBAC**, course management, and instructor/student workflows.
- Implemented **Stripe Webhooks** for secure payment verification and automated course enrollment.
- Optimized performance using **Redis caching**, RTK Query, and API rate limiting for scalable traffic handling.
- Deployed on **AWS EC2** with **Nginx** and **PM2**; integrated **AWS S3** using pre-signed URLs for scalable media storage.

Provably Fair Plinko Game | [GitHub](#) | [Live Demo](#) | *React.js, Node.js, Express.js, PostgreSQL, Prisma, Supabase*

- Built a full-stack **Provably Fair Plinko** game with deterministic outcome generation and persistent game state management.
- Implemented a **commit-reveal fairness mechanism** using server seed, client seed, nonce, and SHA-256 hashing for independently verifiable results.
- Designed RESTful APIs for round creation, gameplay execution, seed revelation, and fairness verification.

Technical Skills

Programming Languages: C++, JavaScript, TypeScript, SQL

Backend: Node.js, Express.js, Phoenix (Elixir)

Frontend: React.js, Redux, Tailwind CSS

Databases & Caching: MongoDB, PostgreSQL, MySQL, Supabase, Redis

DevOps & Tools: Git, GitHub, GitHub Actions, CI/CD, AWS, EC2, S3, Vercel, Nginx

Achievements

- Solved **1500+** **DSA problems** across [LeetCode](#), [CodeChef](#).
- **LeetCode:** Top 3% — **CodeChef:** 3 Rated Competitive Programmer

Education

Ajay Kumar Garg Engineering College

Bachelor of Technology (B.Tech) in Information Technology

Oct 2021 – Jul 2025
