PROFESSIONAL SUMMARY

2025 B.Tech (IT) graduate and Developer with ~9 months of production internship experience building real-world product features using React.js, Node.js, JavaScript, and REST APIs. Experienced collaborating with senior developers, participating in code reviews, debugging across the full stack, and shipping production-ready features in fast-paced startup environments. Passionate about building products used by real users and growing alongside experienced mentors — excited to contribute to DriveZen's live mobility platform.

WORK EXPERIENCE

Full Stack Developer Intern | Sankhyana Consultancy Services Pvt. Ltd. | Bangalore, India *Mar 2025 – May 2025*

- Built real-world product features end-to-end using React.js, Node.js, and Express.js — developed responsive frontends and optimized backend REST APIs, reducing latency by 150ms and improving performance by 30%.
- Collaborated closely with experienced developers — participated in code reviews, pair debugging sessions, and Agile sprint planning — gaining hands-on exposure to real-world software development processes.
- Identified and fixed bugs across the full stack; wrote clean, maintainable, well-documented code and used Git/GitHub with branching and pull requests for team-based feature delivery.

Backend Software Engineer Intern | Go Laddu | Bangalore, India (Hybrid)

Sep 2025 – Apr 2026

- Built production backend services and REST APIs serving real users on a live platform — reduced average API response times by 40% through Redis caching and performance optimization on production workloads.
- Worked alongside experienced engineers on a fast-growing startup — contributed to feature development, code reviews, debugging, and deployment workflows in a collaborative, high-ownership environment.
- Automated CI/CD pipelines with GitHub Actions; managed Linux cloud infrastructure with load balancers and health monitoring — consistently delivered tested, deployment-ready features within Agile sprint cycles.

PROJECTS

Learning Management System | React.js • Node.js • JavaScript • MongoDB • PostgreSQL • Redis • REST APIs • AWS • Docker • Git | [GitHub](#)

- Built and shipped a production-grade full-stack web application with real users — React.js frontend, Node.js/Express.js REST APIs, MongoDB/PostgreSQL database, Stripe payment processing, and complete AWS EC2/Docker deployment.
- Implemented JWT authentication, role-based access, Redis caching, API rate limiting, and GitHub Actions CI/CD — end-to-end product ownership from architecture through deployment on a live platform.
- Wrote comprehensive test coverage, debugged across all layers, and optimized for performance — responsive React.js UI with lazy loading, code splitting, and cross-device compatibility.

Provably Fair Plinko Game | React.js • Node.js • JavaScript • PostgreSQL • Prisma ORM • Git • Vitest | [GitHub](#)

- Built a full-stack application with React.js frontend, Node.js REST APIs, and PostgreSQL database — SHA-256 cryptographic fairness logic, real-time game state, and complete Git workflow with structured version control.
- Wrote a Vitest test suite identifying and validating deterministic backend outputs — demonstrates testing mindset and attention to correctness across a real-world product feature.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, Redux Toolkit, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST API Design, JWT Auth, WebSockets, Background Jobs, Middleware

Databases: MongoDB, PostgreSQL, MySQL, Redis — schema design, CRUD, SQL queries, optimization

Testing & QA: Vitest, Jest, Manual Testing, Test Case Design, Bug Identification, Debugging, TDD basics

DevOps & Cloud: Git, GitHub, GitHub Actions (CI/CD), Docker, AWS (EC2, S3), Nginx, PM2, Linux, Vercel

Languages: JavaScript, TypeScript, SQL, Python (basic), C++, Elixir

Practices: Agile/Scrum, Code Reviews, Pair Debugging, Clean Code, Performance Optimization

EDUCATION

B.Tech — Information Technology | Ajay Kumar Garg Engineering College, Uttar Pradesh *Oct 2021 – Jul 2025*
