PROFESSIONAL SUMMARY

Full Stack Developer with **9+ months** of production internship experience building backend systems, web applications, and **REST APIs**, with hands-on deployment experience on **AWS**. Proficient in **Node.js, Elixir/Phoenix, React.js, Next.js, TypeScript, Python, PostgreSQL, MongoDB, Redis, Docker**, and **AWS**. Skilled in **Agile software development, Data Structures & Algorithms, OOP, API Development**, and **Unit Testing**, with experience in **Python** web scraping, **AI API integration (Gemini)**, **CI/CD**, and performance optimization — improving system response times by up to **40%**. **LeetCode Top 3%** with **1500+ DSA problems** solved. Immediate joiner, open to on-site, hybrid, or remote roles.

WORK EXPERIENCE

Backend Software Engineer Intern

Go Laddu

Sep 2025 – Apr 2026
Bangalore, India (Hybrid)

- Built **REST APIs** and backend services handling live user traffic using **Elixir/Phoenix** in production — improving user engagement by **15%** and cutting average API response times by **40%** through **Redis caching** and performance optimization.
- Developed a **Python** web scraping pipeline using the **Requests library** to fetch and aggregate data from 200+ **Instagram** influencer profiles — automated collection, parsed and cleaned social media profile data, and exported structured datasets to **CSV**, cutting manual data-collection time by **~60%**.
- Deployed and scaled backend services on **Linux** servers using **AWS** with load balancing and production-grade infrastructure; designed **CI/CD** pipelines with **GitHub Actions** for automated builds, testing, and database migrations, cutting deployment time by **~50%**.
- Integrated **Redis caching** (pub/sub + key-value) reducing database load by **40%**; participated in code reviews and delivered tested features on time across every sprint cycle.

Software Engineer Intern

Sankhyana Consultancy Services Pvt. Ltd.

Mar 2025 – May 2025
Bangalore, India

- Built and optimized **Node.js/Express.js REST APIs**, reducing API latency by **150ms** and improving overall application performance by **30%** through query optimization and caching strategies.
- Developed responsive **React.js/Tailwind CSS** frontend components improving UI responsiveness by **40%**; collaborated with teams using **Git/GitHub** to ship full-stack features on schedule within **Agile** sprint cycles.
- Integrated **MongoDB** with **Mongoose** for schema design and data validation, and wrote unit/integration tests using **Jest** and **Supertest**, achieving **80%+** test coverage and catching regressions before deployment.

PROJECTS

AI-Powered Resume Analyzer | [Next.js, Node.js, Express.js, TypeScript, Google Gemini API, Python, PDF Parser, Multer, Vercel](#)[GitHub](#) | [Live Demo](#)

- Built and deployed an AI-powered Resume Analyzer SaaS using **Next.js, Node.js, Express.js**, and **Google Gemini API** — **LLM-based ATS analysis** generating match scores, missing keywords, strengths, and personalized suggestions in under **5 seconds** per resume.
- Implemented PDF upload using **Multer** and **Python-based PDF parsing** to automatically extract resume text from files up to **5 pages**, then integrated the **Google Gemini API** to generate ATS scores, identify missing keywords, and provide personalized improvement suggestions.

Learning Management System | [MongoDB, Express.js, React.js, Node.js, Redis, Stripe, AWS EC2/S3, Nginx, TypeScript](#)[GitHub](#) | [Live Demo](#)

- Built a full-stack LMS with secure **JWT authentication, RBAC**, course management, and instructor/student workflows supporting **500+ enrolled students** across 20+ courses; implemented **Stripe Webhooks** for secure payment verification and automated course enrollment.
- Optimized performance using **Redis caching, RTK Query**, and API rate limiting, cutting average API response time by **35%**; deployed on **AWS EC2** with **Nginx** and **PM2**, and integrated **AWS S3** with pre-signed URLs for media storage.

TECHNICAL SKILLS

Core Competencies: Full Stack Development, Web Development, Data Structures & Algorithms, Object-Oriented Programming, API Development, Unit Testing, Agile/Scrum, Software Engineering, Problem Solving

Languages: C++, JavaScript (ES6+), TypeScript, Python, SQL, Elixir

Backend: Node.js, Express.js, Elixir/Phoenix, REST API Design, JWT Auth, WebSockets

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3, Responsive Design

Python & Automation: Web Scraping (Requests, BeautifulSoup), Data Processing, Automation Scripts, PDF Parsing, CSV Export

Databases & Caching: MongoDB, PostgreSQL, MySQL, Supabase, Redis — schema design, queries, ORM, optimization

AI & Integrations: Google Gemini API, LLM-based analysis, Stripe Webhooks, Third-party APIs

DevOps & Cloud: Git, GitHub, GitHub Actions (CI/CD), AWS (EC2, S3), Docker, Nginx, PM2, Vercel

ACHIEVEMENTS & PROBLEM SOLVING

LeetCode Top 3% — 1500+ problems: leetcode.com/u/shivamyadav2113128 • CodeChef 3 Star Rated: codechef.com/users/strange_things

EDUCATION

Ajay Kumar Garg Engineering College

B.Tech — Information Technology

Oct 2021 – Jul 2025

Uttar Pradesh, India
